3. Advanced usage

3.1. Column span

Table content can be configured to span a specified number of cells.

1	1	1	1	1
2		3		
4				1
2		2		1
5				
1	2		1	1
1	4			
3			2	
1		2		2
2	1	1	2	

3.2. Headers

Table rows can be configured to become headers which are automatically repeated on every new page the table spans. This example also showcases the usage of images inside table cells.

3.3. Subtables

Large tables can be tedious to construct. In order to make the process more manageable, the table component allows building tables from subtables. If subtables do not fit in the current configuration of the table, the table is automatically expanded.
